THE AMERICAN WHITE PRIVILEGE CARD, DON'T LEAVE HOME WITH OUT IT!

WHAT IS WHITE PRIVILAGE?

Most Americans describe White privilege as social values with access to lifestyle benefits and entitlements. While these claims may have relevance; what is often missing is the historic American entitlement of government gifted equity based on race. White privilege started with the British monarchy's **HeadRight Program**. Then after the Revolutionary War the United States government continued this same privilege with **Land Grants**. After the Civil war, the US government initiated the **Homesteading Act**. Gifting White-Americans 2 billion acres of land within 24 hours.

WHAT WAS THE PRIVILAGE?

An **economic generator** that transferred tremendous wealth into the hands of the greater White society. This privilege was a very tangible gift bestowed by the U.S. government. On average, European immigrants received 50 acres of land, plus kidnaped peoples from another continent to enslave towards working that land. Free land; free labor to generate an economy for wealth creation. After the Civil War the United States pushed westward and captured from the indigenous people more land. Then, there was **the most egregious gifting of White Privilege of all time**. During the "Oklahoma Land Rush" the United States gifted more European immigrants nearly two billion acres of land within 24 hours. Not equality, but equity that expands in value over time, and can be passed to heirs from generation to future generations.

OH WHAT TREMENDOUS WHITE PRIVILEGE!

Yet, African-American citizens have yet to receive 40 acres and a mule; as promised. The group African-Americans who've contributed to this nation since the early 1600's have never, ever received anything of **tangible equity** from the United States government. African-Americans have fought and died in every war for this nation. It is the Conservatives in government who won't permit the group African-Americans to receive anything **of equity** from the Federal government. Because it is their intent that African-Americans remain a subordinate labor class of people within the United States. From this nation's inception, that fundamental relationship has never changed. The intent is to maintain this subordinated economic conditioning upon African-Americans.

Along with a gift of wealth creation, the United States government allowed social, economical and political constructs to be placed within the fabric of this nation to **anchor down racism** and it's symptoms upon African-Americans. The US government coddled post Civil War Confederate sympathizers and racist bigots. These racist anchors would affirm privileges to benefit the greater White society for years to come. Years of political domination by way of social and economic discrimination.

A DEFINITIVE RESOLVE

According to the late **Dr. Amos N. Wilson**, the American continent was seized from its indigenous peoples by criminal means and illegitimate circumstances. And for African-Americans to attain a piece of the American pie would make African-Americans an accomplice to what started as criminal circumstances. African-Americans should consider dual citizenship, or abandoning this stolen land for the natural resources that were given to Blacks in Africa by God.
